INDUSTRIAL PC SOLUTION

Industrial automation technology is becoming a rigid requirement for transformation in various industries.
SPES TECH conducts in-depth research on process maps in various industries,
adapts to the software and hardware characteristics of upstream and downstream industries,
and creates an intelligent core driving force for them.

SPES TECH

The world is undergoing profound changes from the industrial era to the intelligent era.
Suzhou Yuankong's industrial control brand **SPES TECH**,
adheres to the corporate mission of "Making production more efficient
and life more convenient because of our existence".

Suzhou Yuankong Electronics Co., Ltd. founded in 2020 and affiliated to China's top 500 companies "Shiyuan Electronics"—CVTE (stock code 002841), computility and computer hardware product solution provider, headquartered in Suzhou Taihu Resort, "Yuankong Electronics" is a national high-tech enterprise with business operations all over the world.

SPES TECH is an independent brand of "Yuankong Electronics", we always adheres to the principle of "Taking computing power as the core" and focuses on the hardware solution design and technical services of IPC. Our products include industrial motherboards, industrial computers, embedded industrial computers, industrial panel PC, industrial touch displays, network appliances, etc. Adhering to the corporate philosophy of "Leaping with intelligence", we look forward to working with our partners to create a win-win situation with excellent computing power.

The concept of industrial computers is extensive and the requirements are complex. Automatic controlling technology will become a must for the digitalization and intelligent upgrading of various industries in the future. SPES TECH insists on the technological leadership of IPC integration solutions as our core pursuit. More than 60% of the employees are technical experts. We have a complete IPD full life cycle R&D management system. Based on many years of practical accumulation in the field of electronic industrial controlling, it helps customers achieve sustainable development.

Scene-based solutions

Extensive industrial control is becoming a rigid demand for the transformation of various industries.

3C Product: Computer / Communication / Consumer Electronic products.

SPES TECH research the manufacturing processes of various industries to study process maps, and use powerful compatibility to help automate production and improve efficiency.

Company Location

Excellent quality

Reliability Test Evaluate the reliability characteristics of your product	30	System function and compatibility Test Verify system functionality, performance, and stability	36
Safety Test Ensure product safety for users and the environment	13	Electronic interference Test Comprehensive evaluation of interference and anti-interference capabilities of electronic products	9
Electrical performance Test Testing telecommunication parameters to ensure compliance with specifications and standards	18	Factory machine Test Strictly control quality before delivery	28

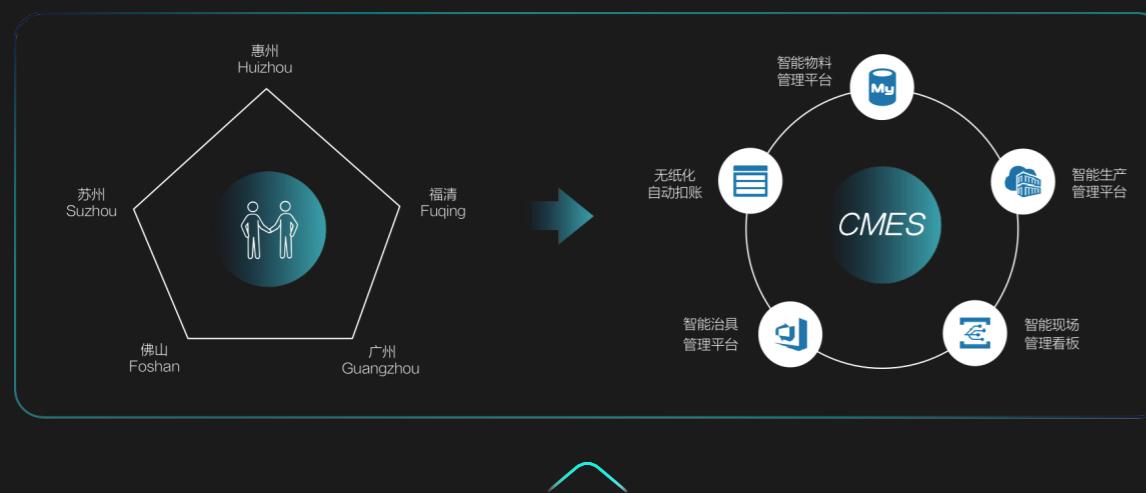

18 Offices in China

106 Test items

*Temperature rise laboratory, safety laboratory, environmental laboratory, shock laboratory – covering all tests from certification to electrical signals.

*Quality test data source: source control internal quality test process project.

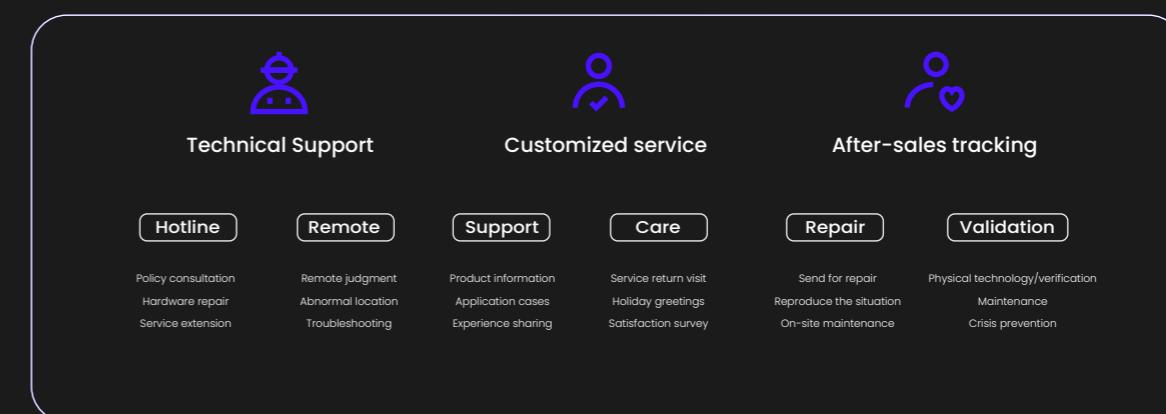

Supply security

Relying on the **Tens of billions-level supply chain procurement capabilities** of ViewSonic, flexible shipments are made through **Five major production industries** across the country to solve the delivery problem of "small quantity and diverse products".

* The data source for company distribution is from internal statistics of Source Control.
The data source for overall supply capacity is from internal management system of CVTE and Suzhou Source Control.

Professional Services

FAE+ Customer Service Team

*SPES TECH source control is dedicated to providing you with professional service guidance for IPC selection.
Log on to www.spesotech.com to learn more about product parameters, call 400-100-5558 for technical support, and FAE technical partners will answer your questions.

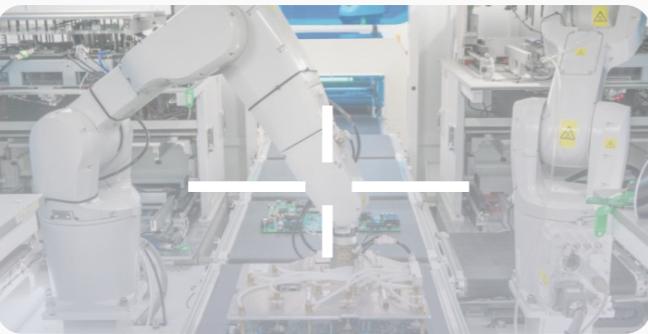

More efficient production

Make life more convenient

Smart device manufacturing

Consumption growth and the development of new technologies have promoted the intelligent transformation of the retail industry. Unmanned retail, smart shelves, logistics monitoring, etc. have not only improved the industry's operational efficiency, but also given consumers a higher sense of satisfaction.

SPES TECH industrial computer series products provide high-quality core computing units for equipment, promoting the construction of an omni-channel ecological pattern in the retail industry.

Smart logistics and scanning sorting

Automatic sorting equipment + artificial intelligence replacing traditional manual labor has become one of the main stream solutions for domestic manufacturing and logistics companies.

SPES TECH industrial computer products can meet the characteristics of long-term and batch sorting of goods in logistics sorting systems in harsh climates where manual labor cannot work for long periods of time, effectively improving production efficiency.

Smart Factory and IOT Intelligence

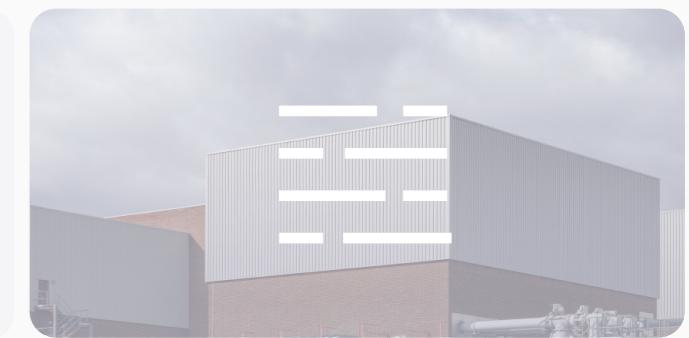

As a new data computing architecture, the deep integration of edge computing and the Internet of Things provides guarantees for the timeliness, security and scalability of data.

SPES TECH edge computing series products can add momentum to accelerate the deployment of Internet of Things applications and help the industry maximize benefits in operational optimization and business transformation. In the era of industrial Internet of Things, the number of connected devices has increased, and all types of data have exploded.

Smart City and Energy Environment

The rapid development of industries such as the Internet of Things, big data and artificial intelligence has enabled the sustainable development of human society, and the ecological environment has also been protected simultaneously. From smart transportation to smart government affairs and smart parks, from medical care to finance.

SPES TECH computing equipment provides full-scenario solutions and services, aiming to improve resource operation efficiency and optimize urban government services and environmental management and governance levels.

Robotics and Automation Control

De-manualization and equipment intelligence have become important paths for the current transformation of the manufacturing industry.

SPES TECH industrial computer series products provide high-reliability core computing units for equipment and facilities, and can be flexibly customized according to customer needs to maximize the guarantee of corporate production operations.

Smart education and technology inclusion

In the era of AI-powered smart education, SPES TECH industry PCs can assist in restoring teaching scenarios, helping teachers improve teaching quality; achieving personalized and precise learning to help students solve learning blind spots; achieving digital management of smart education in large regions, helping schools improve their teaching management level.

Enabling modern education to be more scientific and effective, and promoting the exchange of digital teaching equipment and learning materials, as well as teaching students in accordance with their aptitude.

CATALOGUE

Caution:

1. About model distinction: This catalog is divided into product development models and main sales models. The actual sales model shall prevail in transactions.
 2. About display interface: DP 1.2 supports 4K, the highest resolution is 4096x2160@60Hz, HDMI 1.4 supports 4K, the highest resolution is 3840x2160@30Hz
 3. Regarding specifications: Due to continuous product upgrades, the content is subject to change without prior notice. Please confirm the specifications in advance.

Industrial Motherboard

Various scenarios

SPES TECH has designed industrial motherboards in various sizes, including ATX, Micro-ATX, Mini-ITX, 4", 3.5", COM-E, etc., based on various industrial application scenarios. There are not only H110 / Q170 / Q470 / Q670 / W680 series that support multiple expansion interfaces, but also small-sized or cost-effective J1900 / Elkhart Lake / Tiger-lake UP3 series, etc., all of which have rich internal and external I/O interfaces to meet various needs.

OS Recovery function

All series support the adaptation of the "remote switch" function, providing customers with more convenient use and maintenance and the "OS Recovery" function, which can effectively reduce after-sales maintenance costs; at the same time, for the fields of machine vision, scientific instrument monitoring, motion control, etc., we have designed a variety of PCIE interfaces that support 10/100/1000Mbps network interface expansion cards that can adapt to chassis structures of various sizes.

Motherboard structure and assembly

For example: ATX Form

Assembly instructions

ATX Form

Chassis Diagram

High Degree of Standardization

ATX

- W680
- Q670
- H610
- Q170
- Q470
- H110

Standard ATX size, supports 7-slot PCI/PCIe expansion interface, Intel® 6th-13th Generation Core™ i9/i7/i5/i3/Pentium®/Celeron® CPU.

VGA, HDMI, DP++, DVI and other display modes, support hardware TPM module, with 16-bit editable GPIO, with KB Lock and Case Open functions

It has USB self-recovery function, 5V/5VSB power supply optional, and an internal USB Type-A interface for connecting dongles and other devices.

Micro-ATX

- Q670
- Q470
- H110

Standard Micro-ATX size, supports 4-slot PCI/PCIe expansion interface, supports Intel® 6th-13th Generation Core™ i9/i7/i5/i3/Pentium®/Celeron® processor (up to 65W).

It has multiple display modes such as VGA, HDMI, DP++, DVI, etc., supports hardware TPM module, has 16-bit editable DIO, and has KB lock and Case Open functions.

It has USB self-recovery function, and 5V/5VSB power supply is optional. It also contains a USB Type-A interface for connecting to dongles and other devices.

Mini-ITX

- H110
- H610

Standard Mini-ITX size, supports Intel® 6th/7th Generation Core™ i7/i5/i3/Pentium®/Celeron® processor (up to 65W).

Supports single-slot PCIe expansion, VGA, HDMI and DVI display, with rich I/O interfaces 2x SATA3.0, 4x USB 3.0.

It has a USB self-recovery function and contains a USB Type-A interface for connecting devices such as dongles.

3.5"

- Intel® Elkhart Lake J6412
- Intel® 11th Tiger Lake UP3

Standard 3.5", supports Intel® Elkhart Lake Celeron® J6412 and Intel® 11th Tiger Lake UP3, etc.

Supports 12-24V wide voltage input, has rich I/O interfaces, including 4 Gigabit Ethernet ports, 4 serial ports, 6 USB ports, etc., supports HDMI, DP++, LVDS/eDP

Supports remote switch, and has the unique "OS Recovery" function of source control series products. Small size, low power consumption, complete

4 ports / 2 ports

- I350-AM4
- I210-AT
- X550-AT2

The network card/POE card has 4-port, 2-port, 1-port and other versions, using PCIe expansion interface

Supports Gigabit Ethernet port mode or POE port mode, network chips can be selected from Intel® I210AT/I211AT, etc., speed supports 10/100/1000 Mbps adjustable. POE is powered through the PCIe interface, supports IEEE 1588 and IEEE 802.3af, supports jumbo frames (9,500 bytes) and link aggregation.

The product size is full-height size and half-height size, both can be matched with full-height baffles, and can be adapted to chassis of different sizes. The products are widely used in mechanical vision, scientific instruments, motion control and other fields.

COM-E

- Intel® Core i3-1115G4/i5-1135G7/i7-1165G7
- i3-1115GRE/i5-1145GRE/i7-1185GRE/6305E

11th generation Intel Core™ processor, Tiger Lake UP3 platform

2.95 times graphics rendering processing and responsiveness, the platform uses Intel® Iris® Xe graphics GPU, which is applied to real-time control of computer numerical control (CNC) machines, human-machine interface, tool applications, medical imaging and diagnosis (ultrasound, etc.)

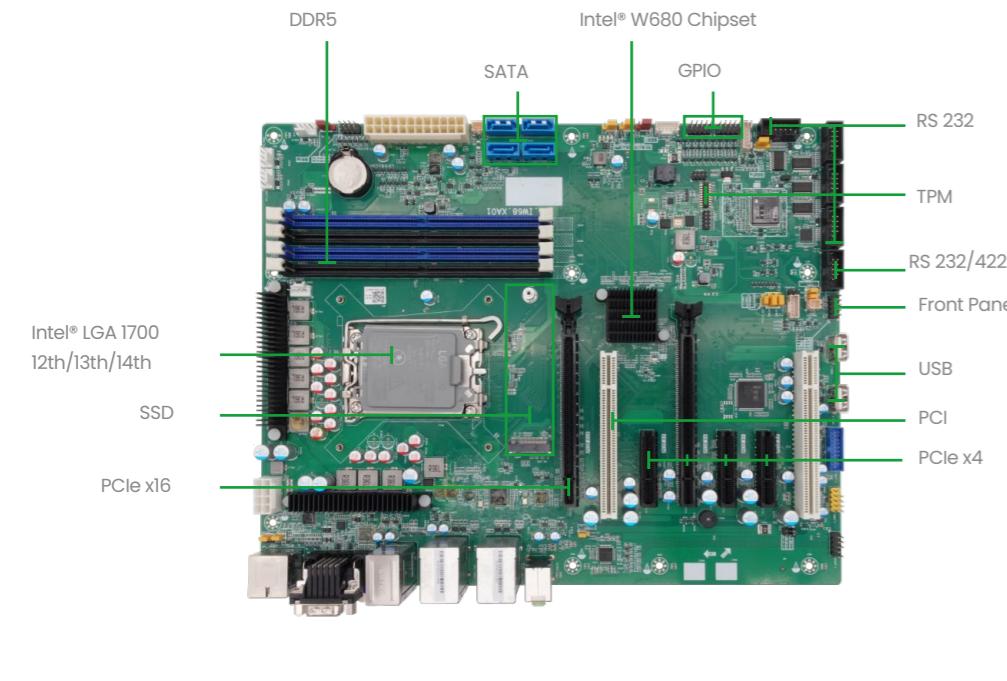

Slots supports:

- 1x PCIe Gen 4.0 (16GT/s), 5x PCIe Gen 3.0 (8GT/s)
- 4x USB 3.2 Gen 2 (10Gbps), 5x USB 2.0 (480Mbps)
- 2.5GbE LAN, 2x SATA 3.0 (6Gbps)

Industrial Embedded BOX PC**Industrial Expandable Fanless Box PC****Exquisite Mechanism Design**

With complete functions, solid shell and smart body, it complies with EMC protection test standards of various countries.

The embedded and scalable structure adopts an integrated heat dissipation structure to help you cope with more stringent operating environments, and choose different processors to meet different performance and rich I/O interface requirements. Some models can support fan selection, adapt to high-generation processors and graphics cards, and are compatible with the underlying AI edge computing performance. The powerful computing architecture cooperates with you tacitly.

Different Industrial Cases

For use cases such as embedded automation control, machine vision, 3C product inspection, robot integration control, and AI empowerment, in order to meet customers' more extensive expansion needs, we recommend that you use an expandable BOX PC that supports up to 4-slot PCI or PCIE expansion.

OS Recovery Function

SPES TECH's full range of industrial computers supports the adaptation of the "remote power on/off" function and the unique "OS Recovery" function, which can meet a variety of usage scenarios and significantly reduce equipment use and maintenance costs.

AI BOX

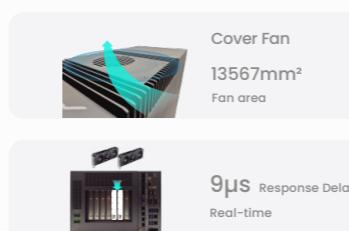

2025

- Scalable modular industrial computer with excellent computing power architecture.
- Intel® 12th/13th/14th Core™ / Pentium®/Celeron® (TDP up to 65W)
- LGA 1700, Q670 Chipset
- 2x DDR5, Max to 96GB
- 6x RJ45, 6x COM
- 1x VGA, HDMI and DP++ Display
- 1x Line-out, 1x Mic-in, optional
- 8x USB 3.2 (Gen 2) , 2x USB 2.0 Type-A
- 16Bit Isolated DIO
- 3x SATA 3.0, 3x SATA Power
- 1x TPM 2.0 pin header
- 2x PCIE x16, 2x PCIE x4

DIO
16Bit Isolated DIO: 8 x DI, 8 x DO
Isolation Level: DI/DO: 2KVDC/AC
Voltage range: High level: 10~38V, Low level: 0~5V
Drive Capability: >350mA
Response frequency: <1kHz

Power
Motherboard power supply:
Fanless: 12V~24V, 7A~3.5A
Fanned: 12V~24V, 12A~6.5A
Voltage floating: High: 12V~5%, Top: 24V~20%
GPU power supply:
DC-IN: 24V ±10% floating

**PJ19**

- 159 x 129 x 38mm
- Intel® Bay Trail Celeron® J1900
- 1x DDR3L SO-DIMM, Up to 8GB
- 2x RJ45
- 1x VGA, 1x HDMI 1.4
- 1x USB 3.2 Gen1, 5x USB 2.0, 2x RS232/422/485
- 12~24V DC, -20°C~60°C

**PELK**

- 192 x 111 x 45 mm
- Intel® Elkhart Lake J6412 (2.00 GHz)
- 1x DDR4 2666/3200MHz SO-DIMM, Max to 32GB
- 4x RJ45
- 1x DP 1.2, 1x HDMI 1.4
- 4x USB 3.2 Gen1, 2x RS232/422/485
- 12~24V DC, -20°C~50°C

**XADL**

- Through expansion, it is suitable for various high-computing power automation scenarios.
- Equipped with Intel® 12th/13th/14th high-performance CPU platform
- Precision structure, compact size, rich I/O, designed for embedded expansion
- Support 12~24V wide voltage power input
- Basic support 4x Intel® Gigabit Ethernet, 8x USB, 6x COM with self-isolation
- Support 8in 8out DIO, DP+VGA+HDMI display (Q670)
- The product can support 2 to 4 slots through expansion cards
- Up to expand PCIe x16, PCIe x4 or PCIe interfaces
- Suitable for machine vision, 3C inspection, robots, AI and other fields with high computing power requirements

COM:
6x COM, including:
COM-1~2 (RS232/422/485); BIOS adjust TX/RX, Isolation Level: 2KVDC/AC;
COM3-6: (RS232 TX RX GND)
Dimension:
229 x 202 x 82 mm, Basic
229 x 202 x 134 mm, 2 Slots
229 x 202 x 156 mm, 3 Slots
229 x 202 x 174 mm, 4 Slots

AI BOX

Industrial Expandable BOX PC

CIS-XADL-LW01-H

Expandable and modular, ready for productivity.

The whole machine is made of SGCC environmentally friendly steel with excellent corrosion resistance, which is capable of withstanding harsh working environments. Multiple air outlets are matched with server-level fans to create an efficient heat dissipation system with extremely strong scalability.

The family-style basalt gray color scheme and the dust filter that does not need to be disassembled make it easy to replace, clean, and maintain. The modular assembly uses anti-drop screws, and the specially designed integrated wave-pattern heat dissipation structure is ready for full-load operation.

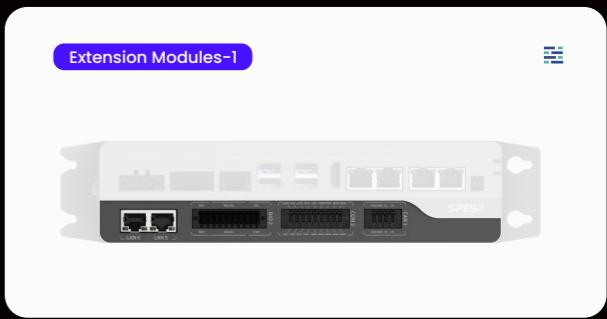

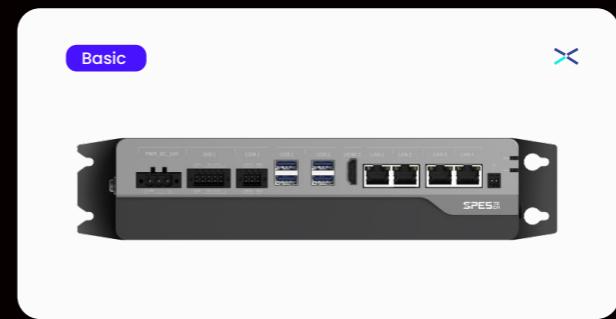

SPS TECH has launched a brand image renewal and upgrade in March 2023.
The actual product appearance is subject to color performance.

ARM Industrial Embedded BOX PC

CIS-RK39-ST01

ARM architecture embedded fanless industrial computer, low power consumption design, 4K video decoding, equipped with 6-core CPU, up to 1.8 GHz main frequency

6 cores CPU
2 cores Cortex-A72
4 cores Cortex-A53

CIS-RK58-ST01

ARM architecture embedded fanless industrial computer, with 6T high-performance computing design, 8K video decoding, equipped with 8-core CPU, and the maximum main frequency is 2.4 GHz

8 cores CPU
4 cores Cortex-A76
4 cores Cortex-A55 NEON

The two ARM-based embedded fanless industrial computers are based on Rockchip platform high-performance processors with multi-core architecture, which combine higher performance with lower power consumption.

They have onboard LPDDR4 memory + eMMC Flash storage and are widely used in video advertising equipment, industrial IoT, deep learning processing, AI algorithms, autonomous driving and other application scenarios.

Industrial PC

Different Industrial Cases

Exclusively designed desktop and rack-mount ed computers in different sizes of 2U/3U/4U, with diverse expansion interfaces and highly efficient heat dissipation capabilities, can be paired with Intel® Core™ series 6th generation and later CPUs to achieve a perfect combination of excellent performance and multiple expansion slots.

Main Application Scenarios

OS Recovery Function

SPES TECH's full range of industrial computers support the "Remote Power ON/OFF" and "OS Recovery" functions, which can meet a variety of usage scenarios and significantly reduce equipment use and maintenance costs.

2U Desk / Rack-mount

- It adopts the industry standard 2U desktop industrial chassis, supports high-performance CPUs such as Intel® 6th ~ /9th Generation Core™ i7/i5/i3/Pentium®/Celeron®, has more comprehensive hardware functions, supports VGA/HDMI/DP++ display, supports 1x PCIe 16 (Gen3) half-height expansion slot, has 4x USB 3.2, 4x USB 2.0, 2x Intel® LAN, 4x COM, supports 2.5" hard disk (SATA 3.0 interface), 8-bit programmable GPIO, and has hardware TPM module/USB Type-A dongle interface and other security devices.
- The structure uses hand-tightened screws, tool-free maintenance, and replaceable dust screen. It not only has excellent performance but also complete functions, which can meet most industrial application scenarios.

3U Desk-mount (standard / Prolong)

- Designed to meet better performance needs and more extensive expansion requirements, it can be paired with high-performance CPUs such as Intel® 6th~13th Generation Core™ i7/i5/i3/Pentium®/Celeron®.
- It can support 4~7 slots PCIE/PCI expansion interface, with ample internal space, and can add multiple graphics cards, mechanical hard disks, expansion cards, etc. It has powerful heat dissipation function, supports 0°C~40°C (HDD) continuous and stable operation, and the motherboard also has rich IO interfaces. Comprehensive safety measures, equipped with Case open / USB dongle / TPM module / OS Recovery and other functions. It is installed with hand-screwed screws, tool-free maintenance, and the dust net can be easily replaced. Compact, standard, and extended types are optional.

4U Desk / Rack-mount

- 4U can give full play to the advantages of high-performance CPU. The large-size 4U chassis provides sufficient expansion space and efficient heat dissipation equipment for the motherboard.
- After debugging, it can adapt to the turbo frequency mode, with rich front and rear panel interfaces and powerful expansion capabilities. It has 7 PCIE/PCI expansion card slots and can be used with Intel® 6th~13th Generation Core™ i7/i5/i3/Pentium®/Celeron® and other CPUs, and can fully release its performance. It can support up to 4 3.5" hard drives (SATA interface) and has comprehensive security equipment (TPM/dongle/Case open, etc.), which can fully meet the needs of industrial application scenarios that require a large number of access devices or a large number of computing units.

Appearance 1

Appearance 2

*The new 4U has two appearance versions, one of which is a version with a front panel. The front panel is made of aluminum alloy die-casting and can be opened with a safety lock and a rotating anklet. The appearance is as shown above.

Characteristic

Intel® 6th~13th Gen Core™ i7/i5/i3/Pentium®/Celeron® etc.
The body has extremely high corrosion resistance and stability, greatly improving product reliability
Using hand-screws, replaceable dust screen, tool-free maintenance
Supports 5.25" optical drive expansion
Can support up to 5-slot 20T 3.5" HDD expansion, 100T HDD
Make full use of chassis space and support 3090 series dual-slot large-size graphics cards

The front panel uses Power LED / HDD LED / LAN LED to easily understand the operating status
Supports the source control-specific OS Recovery backup and restore function, which can effectively reduce daily maintenance costs
The rear of the chassis can support up to 7 x D-Sub9 embedded interface expansion and 7 expansion slots
Can support up to 1250W ATX power supply, and is compatible with redundant power supply
Supports REMOTE and LPT interfaces, which is more suitable for industrial application environments
Suitable for high computing power demand scenarios such as laser welding, AOI detection, OLED detection, etc.

*Each product category has different configurations. The displayed content is for illustration only. The actual product effects (including but not limited to appearance, color, size) and screen display content (background, illustrations, decorative elements) may differ slightly. Please refer to the actual product for details.

Industrial Professional PC

*Only purchase chip products from relevant manufacturers, and the adaptation process is completed independently by source control.

Machine Vision Industrial PC

CIS-IH41-HR01

- A dedicated machine for the visual industry based on the Intel® Comet Lake H410 platform
- The product supports Intel® 10th CPU and has 6 Gigabit Intel® network ports, 4 of which support PoE
- The USB interface has a locking function to meet the connection requirements of smart cameras
- At the same time, the product has 8in/8out isolated GPIO function
- With a 19~36V wide voltage design, it meets the needs of different on-site environments
- Supports expandable PCIe x16 slots and light source control card interfaces to increase scalability

ZHAOXIN Platform Industrial PC

CIS-Z60E-FC01

Powered by 赛芯

- A dedicated industry machine using the Zhaoxin platform, using the KX-6780A platform
- Supports UOS Tongxin system; supports up to 32G memory, 2 storage hard disk slots
- Supports up to 12x COM, 18x USB, to meet the needs of multiple serial ports
- Also supports PCIe x8 interface, expandable graphics card and other devices
- The whole machine adopts a quick-release design with hand-screws, which makes update maintenance and daily maintenance more convenient

PHYTIUM Platform Industrial PC

CIS-CD20-FAGD

Powered by 飞腾

- A dedicated industry machine using the Feiteng platform
- Using the Feiteng D2000 platform, supporting domestic systems such as Kylin, UOS Tongxin, and Hongqi
- Supports up to 32G memory, up to 10x COM, 14x USB
- Supports PCIe x16 interface, expandable graphics cards and other devices
- The whole machine adopts a quick-release design with hand-screws, which makes update maintenance and daily care more convenient

SPES TECH has joined the Phytium ecosystem to jointly build a prosperous, and independent information industry ecosystem: <https://www.phytium.com.cn/partner/>

4U Rack-mount IPC

**Leading the development of industrial automation
Applicable to all industrial use scenarios**

Performance

Quality

Design

Humanized Design

Scan to learn more +

■ Reshaping the appearance

The front panel adopts lightweight design and aluminum alloy pressed one-piece molding process, which brings high strength and durability. It provides better security and reduces illegal operations. The functions of the **rotating hinge**¹ include connection and support. The body is made of SGCC environmentally friendly steel, with a powder coating film thickness of **68μm**,² strong corrosion resistance, beautiful visual appearance, and good electromagnetic shielding performance.

■ Powerful power, flexible configuration, and strong scalability

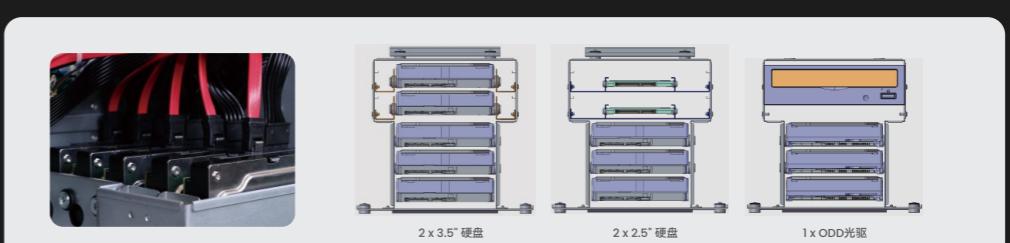

Covering three levels of processors, it has strong scalability, high versatility, and powerful computing power. The box is compatible with ATX/Micro ATX multi-specification industrial-grade motherboards.³

Standard ATX motherboard size: 30.5 x 24.4cm.

Micro-ATX motherboard sizes include: 24.4 x 24.4cm / 24.4 x 18.5cm / 24.4 x 22.5cm, etc.

■ Flexible layout of multiple hard drives

5x
3.5" mechanical HD

A 4U box computer fully loaded with mechanical hard disks, with industry-leading data throughput. The hard disk slot does not take up extra space, with a maximum storage expansion of 100T, supporting advanced storage application scenarios.⁴

Passed the reliability test of 3-axis 2G vibration, the upper 2x 3.5" hard disk can be converted into 2x 2.5" hard disk or 1x ODD optical drive; supports multiple configuration changes to adapt to different scenarios.

¹ The style involved in the "rotating anhlet" is the appearance version with a front panel bezel.

² The industry generally uses a paint film thickness of 70-150μm. Too thick or too thin a thickness will lead to a decrease in coating quality. Too thin a film is prone to cracking and peeling, resulting in the coating failing to play a protective role; too thick a film will increase the cost of the product and reduce production efficiency.

³ Intel® Core™/Pentium®/Celeron® processor query address: http://www.intel.cn/content/www/cn_zh/support/products/873/processors.html#122139.

⁴ As shown in the 3D structure diagram, the lower 3x 3.5" hard disk remains unchanged, and the upper part can be converted into a module, subject to the actual assembly situation.

3C Manufacturing Visual Inspection and Control Solutions

Empowering the 3C industry to improve quality, industrial computers allow computer vision to have great potential.

Compared with human eye observation, machine vision has the advantages of high accuracy, fast speed, high objectivity, and stable detection effect. It is one of the future development directions of digitalization, networking, and intelligence of industrial manufacturing.

At present, my country's new quality productivity of machine vision is accelerating. For example, the defect detection of 3C products has been continuously iteratively developed through technology research and development, product innovation, and market application. The integrated technology of machine vision detection has been continuously improved, and the detection efficiency has been continuously improved.

This solution use CIS-DQ67-FAR1 4U industrial PC:

- Intel® i9-13900 CPU, 36M cache, turbo frequency up to 5.60 GHz, guaranteeing accurate and stable operation of the control system, multi-core operation meets multi-threaded computing requirements;
- Strong scalability to achieve external light source controller, industrial camera, display and other multi-function modules, Reliable internal heat dissipation space of the box to maintain stable operation;
- SGCC steel body, good corrosion resistance and toughness, 7*24 hours continuous stable work, with strong environmental adaptability.

Industrial Panel PC

Complete platform support

The industrial tablet computer has complete functions and a lightweight body.

It can be paired with Raptor Lake U / Celeron J1900 / Elkhart Lake / Tiger Lake UP3 / Rockchip platforms to meet different performance needs. Some models can be equipped with fans.

Various scenarios

13th Industrial Panel PC | Eye-opening

Scan to learn more

Compact body

The screen supports multi-size TFT LCD with five-wire resistive touch screen/ten-point projected capacitive touch screen, adopts 12~24V or 9~36V wide voltage power supply, adopts sealed structure, the front panel supports IP65 grade dust and water resistance and has a power detection LED display, supports WiFi, 4G module expansion, supports USB self-recovery function, and has "OS Recovery" function, which can effectively reduce after-sales maintenance costs.

Support certification

Boosting the upgrade of IOT

-  13th Intel® Raptor Lake U
Multi-core performance / Low load / Multitasking
-  Capacitor/resistor full flat display
LED status light shows product status
-  Integrated die-casting
Bionic heat sink fins / no fear of high temperature environment
-  Fanless passive cooling to avoid dust accumulation /
improve overall cooling performance
-  Multiple I/O interfaces design
Covering most scenarios / worry-free use
-  Front panel IP65 protection
OS Recovery / Reduce maintenance costs

*Screen ratio is measured based on the diagonal of the actual visible screen of the monitor. Actual size may vary slightly due to different configurations and manufacturing processes.

**The display content is for illustration only. The actual product effects (including but not limited to appearance, color, size) and display content (background, illustrations, decorative elements) may differ slightly. Please refer to the actual product for details.

Industrial Touch Display

Precise Vision & Touch

SPES TECH industrial touch display adopts a full-plane five-wire resistive screen and a ten-point projected capacitive screen. The full-plane design is more beautiful and fashionable.

Visualization

Multiple sizes, different application scenarios, with The IP65 protection level could makes the product "worry-free" to use and can adapt to various harsh industrial field environments. The OSD control keys on the side can provide more convenient operation solutions.

Variable

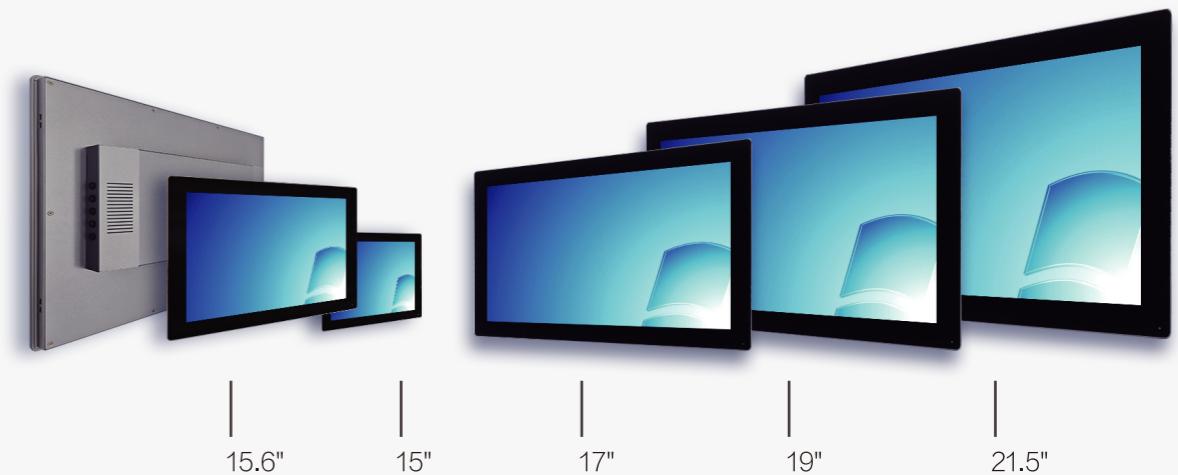

Touch input interface, 1x USB Type-B
USB output interface, 2x USB Type-A
different interfaces, extended needs.
12~24V wide voltage input.

Personalization

The CID display series products are suitable for various workstations, various process stages, and scene equipment such as equipment control, control integrated cabinets, MES production line visualization, central control room visualization, etc., improving the operator's work efficiency, responding to system operation requirements in a timely manner, and ensuring stable and reliable quality to ensure continuous operation.

Protection Certification

*Screen ratio is measured based on the diagonal of the actual visible screen of the monitor. Actual size may vary slightly due to different configurations and manufacturing processes.
The specification parameters of the two types of touch screens, resistance and capacitance, are derived from the test report.
For detailed data, please refer to the CID Industrial Touch Display Product Specification.

5 sizes

15 to 21.5 inches, suitable for different scenes, large size displays more data details.
4:3 or 16:9 screen ratio makes the display more flexible, thus adapting to various software terminals.

2 kinds of displays

Industrial grade touch screen

Resistive touch screen

Capacitive touch screen

The buttons are located on the side of the monitor, 51mm away from the edge of the frame.

Why is it designed like this?

Compared to buttons on the bottom edge or buttons that are hidden too deep, the CID series displays greatly improve operating convenience and can be operated with one hand without flipping or disassembling the display.

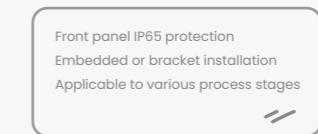

Visualization Assistant

≥85% light transmittance
≥7H surface hardness
10ms response time

10 million touch lifespan
35 million touches
60 million strokes
Pressure value < 10g

Front panel IP65 protection
Embedded or bracket installation
Applicable to various process stages

Network Appliance

Firewall Security Shield

SPES TECH high-performance network security devices can be deployed in various applications such as Gi-LAN / UTM / SeGW / DPI or load balancing.

The Intel-based desktop 1U / 2U network security device provides rich I/O expansion options to adapt to various application scenarios and function expansion.

High-performance network security equipment and network cards

Mainstream platform, using Intel® platform-Skylake / Elkhart Lake and NXP platform-LS1046A.

Domestic platform, using Feiteng-D2000/E2000Q, Haiguang-3450/5480/7475 and Rockchip-RK3568 series processor platforms, with a wide range of memory options, abundant onboard Gigabit electrical ports and Gigabit optical ports, and CPU performance comparable to i5/i7 processors.

The network expansion module is flexible and scalable, and can realize hardware acceleration on the x86 network application platform. It currently supports Intel®-4 RJ45/4 SFP, NetEx-4 RJ45/4 SFP, MuChuang, etc. More supported brands are being continuously updated.

*Only chip products from the above manufacturers are purchased, and the adaptation process is completed independently by source control.

2U Rack-mount

Supports up to 64GB memory

Traditional Platform

Intel Platform-Skylake / Elkhart Lake
NXP Platform-LS1046A

- CNS-BSKL-FGFI is a 2U rack-mounted network application platform with X86 architecture
- C236 chipset
- Supports Intel® Xeon E3 series and 6th/7th Generation Core™ i7/i5/3/Pentium®/Celeron® Processor up to 65W
- Onboard 6x Gigabit adaptive Ethernet ports 2x PCIE 3.0*8 NMC expansion slots
- 1x PCIE 3.0*4 internal expansion slots
- Modular design allows users to flexibly adjust configurations
- OS Recovery backup and restore function can effectively reduce daily maintenance costs

Domestic Platform

Feiteng platform-D2000/E2000
Rockchip platform-RK3568/RK3588

- CNS-BD20-FGFI is a 2U rack-mounted network application platform, ARM architecture
- Adopts Feiteng Tengrui D2000, 8x FTC66 3-core, 2.3GHz
- Onboard 6x Gigabit adaptive Ethernet electrical ports and 4x Gigabit Ethernet optical ports
- 2x PCIE 3.0*8 NMC expansion slots, 1x PCIE 3.0*4 internal expansion slots
- Modular design, convenient for users to flexibly adjust configurations
- OS Recovery backup and restore function, which can effectively reduce daily maintenance costs

Network expansion module

Intel-4 RJ45 / 4 SFP

NETSWIFT NIC-4 RJ45 / 4 SFP

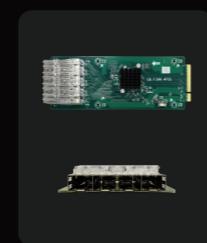

MUCSE

2 platforms**4 modules**

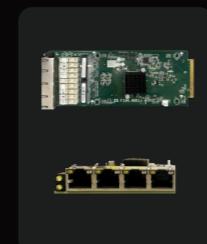

CNS-BD20-FGF1

- ARM architecture
- Using FHYTIUM Tengrui D2000, 8 FTC663 cores, 2.3GHz
- 2x USB 3.0
- 6x Gigabit adaptive Ethernet electrical ports
- 4x Gigabit Ethernet optical ports
- 2x PCIE 3.0*8 NMC expansion slots
- 1x PCIE 3.0*4 internal expansion slots
- Modular design, convenient for users to flexibly adjust configurations
- OS Recovery backup and restore function reduces daily maintenance costs

CEB-FIHN-4F01

- PCI Express x8 GF (x4) Gen2
- 1x i350-AM4 Chipset
- 4x SFP Fiber slots
- 1000Mbps speed
- 12V/10W

CEB-FIHN-4G01

- PCI Express x8 GF (x4) Gen2
- 1x i350-AM4 Chipset
- 4x RJ45 slots
- 10/100/1000Mbps speed
- 2x Bypass (3rd)
- 12V/10W

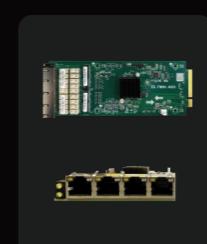

CNS-BSKL-FGF1

- X86 architecture, C236 chipset
- Support Intel® Xeon E3 Series and 6th/7th Generation Core™
- i7/i5/i3/Pentium®/Celeron® Processor up to 65W
- 2x USB 3.0
- 6x Gigabit adaptive Ethernet ports
- 2x PCIE 3.0*8 NMC expansion slots
- 1x PCIE 3.0*4 internal expansion slots
- Modular design, convenient for users to flexibly adjust configurations
- OS Recovery backup and restore function reduces daily maintenance costs

CEB-FWHN-4F01

- PCI Express x8 GF (x4) Gen2
- 1x WX1860A4 Chipset
- 4x SFP Fiber slots
- 1000Mbps speed
- 12V/10W

CEB-FWHN-4G01

- PCI Express x8 GF (x4) Gen2
- 1x WX1860A4 Chipset
- 4x RJ45 slots
- 10/100/1000Mbps speed
- 2x Bypass (3rd)
- 12V/10W
